PERSONAL PROJECTS

- **CloudNote App** [GitHub Repository](#)
Tech-Stacks : MongoDB, ExpressJS, ReactJS, NodeJS, CSS, JavaScript
 - Developed a full-stack application using the MERN (MongoDB, Express.js, React.js, Node.js) stack to create a responsive cloudNote application.
 - Implemented user authentication and authorization functionalities using JWT (JSON Web Tokens) for secure access to the application.
 - item Designed and implemented CRUD (Create, Read, Update, Delete) functionality for managing user-specific notes, utilizing RESTful APIs and MongoDB for efficient data management.
- **trueFeed NEWS App** [GitHub Repository](#)
Tech-Stacks : ReactJS
 - Designed a responsive UI for category-wise news using ReactJS and Bootstrap. Implemented intuitive navigation and seamless user experience across all devices
 - Integrated an external API to dynamically fetch and display course data, including images, titles, and descriptions. Implemented category-based filtering functionality using React state.
- **Personal Portfolio** [GitHub Repository](#)
Tech-Stacks : HTML, CSS, and JavaScript
 - Developed a fully responsive, minimalistic portfolio website from scratch using HTML, CSS, and JavaScript.
 - Implemented a clean and intuitive user interface, including navigation, about, experience, projects, and contact sections.
 - Successfully deployed the website on Netlify, showcasing the ability to build and launch professional web projects.
